Irina Koshel

QA Engineer

EDUCATION

Author's courses of testing by Vadim Ksendzov, 2021
https://ksendzov.com
https://t.me/peolomot

Testing theory course, 2021
https://www.youtube.com/c/ArtsiomRusauQALife

SQL Course, 2021
https://www.sololearn.com

Books: Savina R., Kulikov S.

Business English course, 2021
linkedin.com/in/valeria-tsykunova-75a481165

International State Ecological University by A.D.Sakharov, 2005
Environmental monitoring and audit
Belarusian State Economic University, 2017
Accounting and control at the enterprise

HOBBY

Sport
cycling, swimming, tennis, skiing, athletics
Traveling
Belarus is multifaceted too
Reading
self-development books are my favorites
Movie
my favorite films are biographical and based on real stories

HARD SKILLS

- **Postman** https://github.com/IrKoshel/POSMAN
  - Environment recording, sending requests GET, POST, PUT, DELETE, run collection;
  - Writing tests: checking the response code, json schema, response values, passing response values to another request.
- **GitHub** https://github.com/IrKoshel
  Working with local and remote repositories (creating/removing a repository, adding/removing files, creating/ removing branches, merging branches to the main branch), working in GitBush.
- **SQL, MySQL, MS SQL Server, PostgreSQL**
  https://github.com/IrKoshel/SQL
  I can use SELECT, INSERT INTO, ORDER BY, LIKE, JOIN, UNION, DISTINCT, UPDATE
  - 20 solved SQL tasks on sql-ex.ru.
- **Dbeaver** https://github.com/IrKoshel/Dbeaver
  Creating a database and tables, setting primary and foreign keys, deleting data, generating a database diagram.
- **Linux** https://github.com/IrKoshel/Linux
  Working with the terminal: pwd, cd, ls, touch, mkdir, find, rm, mv, cat, more, less, head, tail, cp, sudo !!, curl, date, cal, chmod.
- **Charles, Fiddler** https://github.com/IrKoshel/Charles_Fidler
  Installing a certificate, configuring a proxy server, intercepting and analyzing traffic, modifying traffic.
- **JMeter** https://github.com/IrKoshel/JMeter
  Creating test scenarios, analysis of the results of load testing.
- **Android Studio** https://github.com/IrKoshel/Android-Studio
  - building and running the application on an emulator and a real device;
  - sniffing traffic from the emulator using Charles;
  - view logs on the emulator using ADB.
- **ADB** https://github.com/IrKoshel/Android_Debug_Bridge
  Working with Windows command line, connecting a device via WiFi and USB, outputting logs to a file, installing and uninstalling applications.
- **DevTools** https://github.com/IrKoshel/Devtools
  Reading logs, watching server response codes, request and response scripts, simulate a web page on different devices, clearing cookies.
- **Jira**
  Creating Kanban and Scram boards, creating issue, adding team members
- **TestRail**
  Creating test cases, test suite, run test cases, creating reports.
- **Checklists / bug reports**
  https://github.com/IrKoshel/Test_Documentation
- **Testing theory**
  Types of testing, testing methods, software development and testing life cycle, agile methodologies, checklists / test cases, bug reports, etc.
- **Language**
  - English- B1
  - German - A1
  - Russian - native language
